DETAILED ACTION

Preliminary Amendment

In view applicant's preliminary amendment received March 19, 2004, amendments to the claims have been entered and examined. Claims 1-25 are pending.

Information Disclosure Statement

Applicant's information disclosure statement received March 16, 2005 has been entered and considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by UK Patent Application GB 2062056A to Neumann.

Claim 1:

Neumann discloses a tile roof system comprising an overlayment (page 1, line 7), a tile (page 1, line 14), and a batten (page 1, lines 59-62) disposable between the tile and the overlayment, the batten comprising at least one layer comprising a generally planar first ply (bottom planar portion, Figure 5) and a

second ply (inverted V-shaped portion, Figure 5), the first and second plies cooperating to define a multiplicity of passages (1, Figure 5) extending generally transversely to a longitudinal axis of tile batten.

Claim 14:

Neumann discloses the method of installing a tile on a roof with a slope, comprising the steps of providing first and second battens (page 1, line 65), each batten comprising at least one layer of a material comprising first (bottom planar portion, Figure 5) and second plies (inverted V-shaped portion, Figure 5) defining a multiplicity of air passages therethrough (1, Figure 5), the passages extending generally transversely to a longitudinal axis of the batten (page 1, lines 59-62), fixing the first and second battens on the roof such that longitudinal axes of the first and second battens are generally parallel and extend generally horizontally to the roof slope; and fixing the tile atop the first and second battens (page 1, lines 13-14).

Claim 22 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by US Patent 3647606 to Notaro.

Claim 22:

Notaro discloses a multi-layered member capable of being disposed between a roof decking and an exterior roof material, the member comprising a plurality of stacked, completely separate layers (21, 22, 23, Figure 7) fastened together by stitching (column 4, line 58), each layer comprising a generally planar first ply (21, Figure 7) and a second ply (22, Figure 7) cooperating with the first ply

Application/Control Number: 10/805,686

to define a multiplicity of passages, the passages extending generally transversely to a longitudinal axis of the spacer.

Allowable Subject Matter

Claims 2-13 and 23-25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15-21 are allowed.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naoko Slack whose telephone number is (571) 272-6848. The examiner can normally be reached on Mon-Fri (6:00 am-2:30pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl D. Friedman can be reached on (571) 272-6842. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/805,686
